

AKASH V

Software Developer

Mangalore, KA 575022 | +91 8073765031 | akashvmsn@gmail.com | [linkedin.com/in/akashv10](https://www.linkedin.com/in/akashv10) | github.com/BlxrryFxce17

PROFESSIONAL SUMMARY

Software Developer with hands-on experience in full-stack web and backend service engineering. Proficient in Node.js, Express, Python, FastAPI, React, and MongoDB/MySQL, with practical expertise in designing resilient REST APIs, orchestrating multi-LLM pipelines with failover handling, and deploying real-time computer vision models. Adept at OOP principles, heuristic algorithms, and production software architecture.

TECHNICAL SKILLS

Languages:	JavaScript, TypeScript, Python, SQL, Java, C
Frameworks & Libs:	Node.js, Express, React, Redux, FastAPI, React Native, OpenCV, MediaPipe, PyTorch, Transformers, Tailwind CSS
Databases & Tools:	MongoDB, MySQL, Git, GitHub, REST APIs, Postman, Streamlit, Uvicorn, Vite, Gemini API, Groq API
Core Concepts:	Data Structures & Algorithms, Object-Oriented Design (OOP), Multi-LLM Orchestration, System Architecture

EXPERIENCE

Techpath

Jan 2026 – June 2026

Full Stack Developer Intern

Mangalore, Karnataka

- Architected and deployed asynchronous backend REST APIs using **Python, FastAPI, and Uvicorn**, optimizing database queries in **MySQL** to reduce response latency by ~20%.
- Engineered reusable, responsive UI components using **TypeScript and JavaScript**, improving cross-platform rendering performance and state consistency.
- Implemented structured error-handling middleware, modular service layers, and schema validation following OOP principles to ensure production stability.

KEY PROJECTS

AI Job Finder – Autonomous Application Pipeline | React, Node.js, Express, MongoDB, Groq, Gemini API, Apify 2026

- Architected an autonomous job application pipeline using **Apify and Adzuna APIs** with a Clearbit and Google Dorking lead-enrichment engine for verified HR contact discovery.
- Engineered a resilient AI orchestration layer leveraging **Groq (Llama-3) and Gemini APIs** with automatic failover, exponential backoff, and JSON auto-repair middleware to generate tailored cold emails.

AirCanvas – Touchless 3D Spatial Whiteboard | Python, OpenCV, MediaPipe Tasks, NumPy 2026

- Architected a real-time touchless canvas extracting 21 3D spatial hand landmarks via MediaPipe, integrating linear interpolation smoothing to eliminate input coordinate jitter.
- Engineered a custom heuristic gesture engine isolating 4-finger coordinate evaluations to prevent occlusion false positives, with Z-axis depth scaling for dynamic stroke width.

AI Grammar Corrector – NLP Inference Engine | Python, PyTorch, Hugging Face Transformers, T5-LoRA, Streamlit 2026

- Fine-tuned a T5 transformer using **LoRA adapters**, reducing model parameter overhead by over 80% while maintaining high semantic accuracy across multi-sentence paragraphs.
- Engineered a low-latency GPU/CPU inference pipeline with configurable beam-search parameters, delivering sub-500ms latency with side-by-side diff visualization.

FilmFolks – Movie Discovery & Social Platform | React, Redux, Node.js, Express, MongoDB Atlas, TMDB API, JWT 2025

- Built a full-stack Single Page Application with **Redux state management**, querying external TMDB APIs via a secure backend proxy layer to prevent key exposure and CORS errors.
- Implemented secure JWT-based user authentication and protected routes for personalized watchlists and community review moderation.

EDUCATION

Master of Computer Applications (MCA)

2024 – 2026

St. Aloysius (Deemed to be University), Mangalore

Mangalore, Karnataka

Bachelor of Computer Applications (BCA)

2021 – 2024

Srinivas University, Mangalore

Mangalore, Karnataka

CERTIFICATIONS

- Object Oriented System Development:** NPTEL (UML, Java, and Design Patterns)
- Artificial Intelligence for All & Basics of Python:** Infosys Springboard
- Introduction to Cloud & SQL and Relational Databases 101:** Cognitive Class

LANGUAGES

English, Hindi, Kannada, Malayalam
